Theme Template Walkthrough

Lead Covered Agency Report - General

- ❖ Reports should Reflects the activities associated with all NGDA
 - ❖ Covered Agencies have responsibilities to contribute
- ❖ The template will facilitate consistency across 18 themes
- ❖ Portfolio Management (PfM) Team prepopulated some tables.
 - ❖ Theme Leads: Coordinate review and track any required changes. This will allow us to modify any associated lists managed by the PfM team.
- ❖ Instructions are provided in the template and *Appendix B*
 - ❖ *Template References for Populating Report Tables* provides you with examples to support your work.
- ❖ Reports will be delivered as a link to the GDA-Lead Covered Agency- Themes Team Room

FEDERAL GEOGRAPHIC DATA COMMITTEE

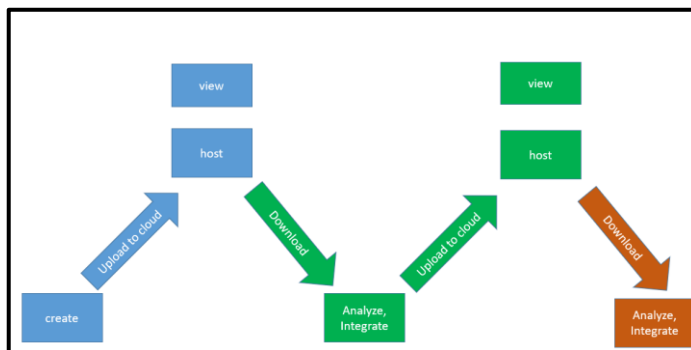

What is the GeoPlatform

- “The Committee shall operate an electronic service that provides access to geospatial data and metadata for geospatial data to the general public, to be known as the GeoPlatform” GDA § 2807

Pipeline for Data Production Generation: From Metadata Discovery to Data Discovery

Legacy Upload / Download Workflow

Legacy metadata and legacy tools support workflows that treat the cloud not much differently than an ftp site. Metadata becomes an index to a file to download to a local computer. In support of GDA implementation, Geoplatform will expand support for machine readable metadata, automated data discovery, linked open data, machine learning, and modern cloud-based workflows including open data caches.

This will provide the greatest value to public and industry for the investment in national spatial data.

Present

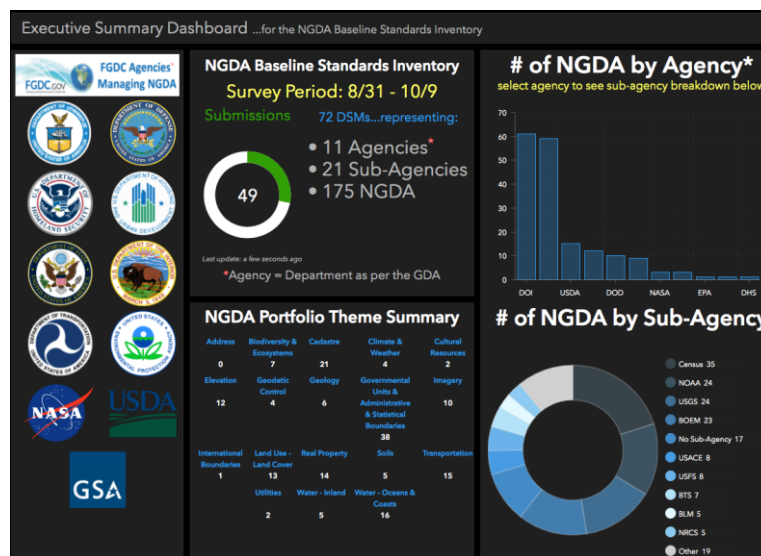

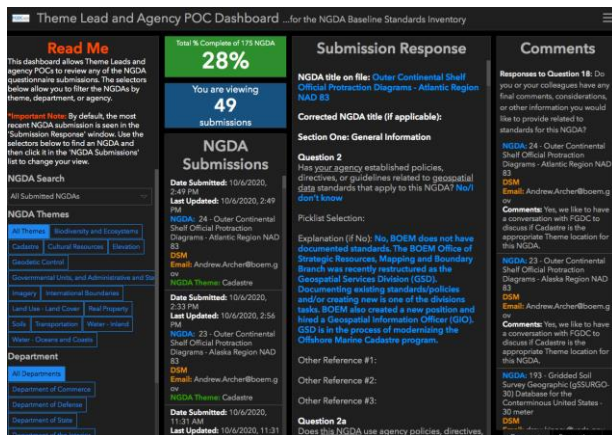

- New JIRA for Service Desk Project created
- All tickets tracked via JIRA Service Desk
- Central point to search all tickets
- Create custom notifications
- Automation
- Custom queues for tracking different requests, status, or labels
- Categorization and compartmentalization of request types

Migrated from LimeSurvey to Survey123

- Improved Survey metrics, ease of use, and additional reporting features
- Increased efficiency for the SD manually responsible for curating, editing, publishing all survey requests
- Once official shut off, funds can be relocated

Note Proposed official LimeSurvey shut off for last remaining items, the LMA (dashboard will be converted to hosted excel sheet)

October 15th, 2020

Things to note:

- The Baseline Survey: **23%** of the total number of SD Requests.
- Baseline Survey support has the **highest** number of requests and support time

Improved Security Model

Current Limitations

- Special roles for administration and curation built into applications; difficult to configure or track
- Coarse security: read or write
- No extensibility
- No ability to model cross-cutting concerns
- OAuth 2.0 architecture, but not OIDC compliant; limits integrations
- Limited M2M options

Improved Security Model

- External role configuration with ability to apply cross-cutting concerns via group and scopes
- Fine-grained, Business-oriented roles to support NGDA needs; curation, publishing, collaboration and distribution.
- Composite security design; roles can be mixed to avoid combinatorial explosion of defined roles. Facilitates long-term maintainability.
- OIDC compliance; including additional grant_types to support service account and other M2M functions.
- Explicit role per NGDA Theme: ngda:addressing, ngda:transportation
- Functional roles: publisher, owner, etc.
- Effective permission are combined per user: “ngda:transportation + publisher” allow user to trigger process of a new official update to a dataset.
